- The following text was added: *Record type 16 is to be initiated in most cases where loan servicing is handled by an entity other than the holder (lender) of a loan. The Date of Servicer Responsibility represents the date a servicer assumes responsibility for a loan. In cases where a servicer is responsible for the loan origination process, this could be the Date of Guaranty. Otherwise, it is the date responsibility for servicing a loan transferred from a lender to a servicer or from one servicer to another servicer. Just as a Record type 16 is initiated by the purchasing lender to report the purchase of a loan, a Record type 16 is initiated by the initial servicer, or the receiving servicer in a transfer situation, to notify the guarantor that a third party servicing relationship exists. Note regarding consolidated loans – Record type 17 (Consolidation Loan Notification) contains Servicer code and Servicer Responsibility date. These fields are populated when a non-holder services the consolidated loan. As such Record type 16 should not be submitted in this scenario.* (Issued 04/01/2005)
- Record Level Edit 071 was added (Issued 04/01/2005).
