Issue 1059DC

Description:

Record type 44 Field 20 (Student SSN) references error code 174 and states – If loan type is other than PL or AL, Student SSN must be zeros [174]. However, if you refer to Appendix B – Edit Codes for error 174 states – If loan type is other than AL, GB or PL, Student SSN must be zeros. Record type 44, Field 20 is referenced with this error.

Resolution:

DACAT agreed to add 'GB' to edit 174 in Record type 44 Field 20 to match edit code description in Appendix B for edit 174. In addition to Record type 44 Field 20, the other CAM DAAR and Claim fields for Student SSN (Record type 43-19, 53-19, 54-20 and 64-20) will be modified to reflect this change.

Chapter 12	Page 10	Added 'GB' to edit code 174.	07/31/2008

Issue 1060DC

Description:

Looking for guidance on the following situation: We have a guaranty system edit that does not allow a new pre-claim to be added if the payment due date is not before the current process date. Related to CAM Record type 44 Field 34 'Payment Due Date' – there doesn't seem to be a specified field error to associated with this situation so we are wondering if a Global edit [008] or record edit [089] is appropriate. Perhaps a different error not noted here might be more accurate (?) [008] Must be less than or equal to as-of-date in Record type 01 [089] A DAAR update has been received but number of days delinquent falls below regulatory guidelines.

Resolution:

DACAT agrees that adding an edit for this situation would be beneficial. Global edit [008] 'must be less than or equal to as-of-date in Record type 01' will be added to the next version of CAM for Record type 44 Field 34.

Issue 1061DC

Description:

CAM Record type 43, edits 156 and 157 for Fields 25 and 26 conflict and do not allow for NLN or NFN to be used in place of the Endorser, Co-Maker or the PLUS Student's Name.

Resolution:

DACAT discussed the merits of having both edits 156 and 157 for the name fields in the 40 and 50 CAM records and determined that edits 102 and 156 (first character of name cannot be space and first and last names cannot both be NFN and NLN) adequately address name requirements so edit 157 isn't necessary (completed name information must be provided). The CAM documentation will be revised to remove edit 157 from DAAR and Claim CAM records (and references in Appendix B) for the next publication. The Record type and fields are: 40-30, 40-31, 42-27, 42-28, 43-25, 43-26, 50-30, 50-31, 53-25 and 53-26.

Issue 1062DC

Description:

Correction to the CAM Manual requests: Cam Record type 43 Field 37, Filler has a Requirement code of 'R1'.

Resolution:

DACAT agreed with the recommendation to change the requirement from R1 to R in Field 37 of Record type 43 (filler). The CAM documentation will be revised accordingly for the next publication.

Issue 2062GM

Description:

Add 'MR' Deferment type per Technical Update GA-2008-02 to the list of possible deferment types.

Resolution:

Add 'MR' as a valid deferment type.
