REFERENCE (@5) DETAIL RECORD(S)

This document is an addendum to the NCHelp CommonLine® Network for FFELP and Alternative Loans Application Send File description for CommonLine Release 4 processing. It explains the field layout of the Reference (@5) Detail Record(s). This record type is optional. You may include this record type in the Application Send File when submitting borrower reference or employer information included on the application, depending on your agreement with the service provider.

NOTE

The Reference (@5) Detail Record(s) dated 11/01/2008 for CommonLine Release 4 processing is the most recent release of this format. It replaces the NCHelp CommonLine® Network for FFELP and Alternative Loans Application Send File Reference (@5) Detail Record(s) (dated 07/30/1999), the Blanket Guarantee Addendum (dated 12/20/1999), the Release 4 Addendum (dated 2/26/2003), and the Release 4 HERA Addendum (dated 5/12/2006).

If you are including this record type, there may be multiple Reference (@5) Detail Record in the file for each loan or application with borrower reference or employer information. The @5 Detail Record must follow the corresponding Application Send (@1) Detail Record or related records (i.e., the @5 Detail Record must fall before the next unrelated @1 Detail Record).

NOTE

This record type is optional. Service providers and school-based software (SBS) are not required to support this record. If organizations receive information for which they have no agreement to accept, they should ignore this information, and should not produce a fatal processing error.

If you are including this record type, certain fields are required as indicated in the Layout table. If you are not submitting borrower reference or employer information, do not include this record type. The fields listed below only apply to reference or employer information.

The following Layout table lists all of the fields to be contained in the Reference (@5) Detail Record(s). Each field's required status, start position, length, data type, justification, and padding are also included. A definition of each field is provided after the table.

The codes appearing in the columns are:

- R = Required
- S = Strongly recommended
- O = Optional
- = Not applicable (provide default value)
